

# AERIALSHIELDS PRACTICAL OVERSPRAY PROTECTION

## KEY FEATURES:

- › Provides overspray protection to platforms, extensions, rails, and controls
- › Easy to install and one size fits multiple machines
- › Allows access to controls while warning labels and logos remain visible
- › Features removable door for easy entry and exit
- › Seals around hinges, latches, & safety chains
- › Stock items ship the same day
- › Features a bungee base for a secure fit
- › Saves hours of power-washing or reapplying sprays & stickers
- › Made in the USA

## ADDITIONAL LIFT ACCESSORIES

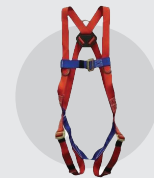

### TIRE SOCKS

TireSocks, sometimes referred to as tire booties, no marks tire covers, wheel socks, wheel booties, lift wheel covers, or non-marking forklift tire covers.

### DRIP DIAPERS

Provide superior leak protection and offer several advantages over similar products. Unlike DIY solutions like plastic and duct tape, our lift diapers effectively absorb equipment leaks and are tough enough to provide floor protection.

### BOOM LIFT HARNESSES

A lift harness is one of the most powerful safety tools available. They allow workers to safely complete tasks at heights and meets OSHA requirements.
